A snapshot of snowbird 'flight paths'

A small percentage of Dakotans heads to a warmer climate for the winter each year. This map shows some of the destinations of snowbirds who subscribe to three Dakota newspapers who have those newspapers sent along to their winter locations. In addition to the numbers below, the *Faulk County Record* and the *Clark County Courier* both report that most of their snowbirds head to Arizona, with additional travelers to Texas, Florida and California. The *Record* also reports address changes to New Mexico, and "even one family to old Mexico," said editor Jim Moritz. *Note that this is not intended to be a scientific or complete list.*

From The Bible Journey

How often have we been the stranger? (how often have we left our privilege behind?)

How do we determine who is deserving vs. undeserving of help?

How often have we traversed a barrier to connect to someone outside our comfortable circle?
